** To be filled out by Project Manager*
** Visual Evidence Required:*
(1) Code Snippet: A "Diff" (Before vs. After code)
(2) Validation: Screenshots/ Screen Recording of the system functioning correctly.

Bug ID	Assigned To	Severity	Bug Description	Root Cause Analysis *(Why it happened)*	The Fix *(Briefly explain logic change)*	Status *(Resolved/ Unresolved)*	Visual Evidence (Before)	Visual Evidence (After)
D001	Colot	Cosmetic	Placement of search bar and filter on "User Management" Tab	During the exploratory testing, the testers found the anomaly D001. The search bar and filter are not balance if the developers made the search bar and the filter fill the entire top space of the card in the "All Users" page, instead of having a blank space on the right.	We have change the spacing to	Resolved		
D002	Artanza	Cosmetic	All users page, Text size	During the exploratory testing, the testers found the anomaly D002. Some texts are very too small and would be pretty hard for other with visually impaired users to view. (Sub-headers) specifically on the all users page the "Total: 0 Users".		Resolved		
D003	Bernabe	Cosmetic	Recaptcha Input Field Placement	During the exploratory testing, the testers found the anomaly D003. The placement of the recaptcha. The design should be intuitive by adding inserting the recaptcha field before the login button. Just ensure the recaptcha is placed above the login button to imply pre-requisite checkpoint for login. Small revision should be considered.		Resolved		
D004	Artanza	Cosmetic	Login Page. Error message Duplicate	During the exploratory testing, the testers found the anomaly D004. Error attempt the message "... attempts remaining" duplicates in the signup page during bride force login.		Resolved		
D005	Bernabe	Cosmetic	Text Wrapping	During the exploratory testing, the testers found the anomaly D005. Text wrapping. Text should wrap to show full details instead of trailing off with an ellipsis (...)		Resolved		
D006	Artanza	High	Reset Password Email Code Verification	During the exploratory testing, the testers found the anomaly D010 which is the code verification for password reset. Users are unable to proceed to the reset password fields because code verification isn't working. Further reviews should be observed.		Resolved		
D007	Bernabe	Medium	Newly Invited Instructor Account Login via Gmail	During the exploratory testing, the testers found the anomaly D011. Newly invited instructors should be able to receive a hyperlink/button that directs them to the login page. However, the test failed due to the wrongfelted link was sent. Further reviews should be considered.		Resolved		
D008	Bernabe	Cosmetic	"Grading Info" badge misalignment	During the exploratory testing, the testers found the anomaly D015. The "Grading Info" badge is misaligned. Fix the UI/CSS for the Instructor's view of the "Grade Management" Page.		Resolved		
D009	Artanza	High	No caching, pages load on every visit. cache API request in the client side to minimize load times	During the exploratory testing, the testers found the anomaly D003. Use @tanstack/react-query library to cache API request and minimize load times. Currently, pages load everytime you visit a page. (Optimization recommended)		Resolved		
D010	Colot	High	ADD INSTRUCTOR PAGE: the system accepts "space" as valid input when adding instructor. The system also does not disable the "Send Invitation" button when a request is already pending, allowing the user to send multiple invites when spamming "Send Invitation" button.	During the exploratory testing, the testers found the anomaly D016 is a crucial system flaw in Add Instructor Modal. To recreate the bug, only put "space" in the "ID" and "Full Name" field, fill up the email, college , and department. spam click "Send Invitation" button.		Resolved		
D011	Artanza	Medium	On Student Edit Profile page, error messages appear at the back of the edit model, which cant be seen	During the exploratory testing, the testers found the anomaly D017 that error messages when editing profile in student profile page appear at the back of the modal.		Resolved		
D012	Bernabe	Cosmetic	Should be able to close modal when clicking outside the modal	During the exploratory testing, the testers found the anomaly D005. The modals used in the system does not close when clicking outsideTo recreate, open any modal. "Add Semester" for example. Attempt to click outside, it does not close		Resolved		
D013	Bernabe	Cosmetic	No useful error message when creating a section when creating a section when no instructor is chosen	During the exploratory testing, the testers found the anomaly D018 which is the system does not provide useful information for the error when creating a section when no instructor is chosen		Resolved		
D014	Bernabe	High	When inviting an instructor, the system does not accept "@buksu.edu.ph" email and "@student.buksu.edu.ph"	During the exploratory testing, the testers found the anomaly D009 when inviting an instructor, the system does not accept "@buksu.edu.ph" email and "@student.buksu.edu.ph". To recreate, try inviting an instructor with the email "hidimsung@buksu.edu.ph".		Resolved		
D015	Colot	Low	After registering a student account, it should log in automatically and redirected to dashboard	During the exploratory testing, the testers found the anomaly D019 that after completing the student registration form, the system redirects back to the login page instead of logging in automatically and redirecting to dashboard		Resolved		
D016	Colot	Low	Remove successful refresh modal when clicking refresh button in Instructor > Manage Grades page	The suggestion deemed to unnecessary.	None	Resolved		
D017	Bernabe	Medium	Admins must be able to edit their information in the profile page	During the exploratory testing, the testers found the anomaly D013 that admins are not able to edit their information in the profile page		Resolved		
D018	Bernabe	Medium	Logs must include more robust information, like ip address of the request origin, device used, etc. to allow traceability of the used	During the exploratory testing, the testers found the anomaly D020 that the logs currently contains basic information about the action executed. This is not nearly as useful when actually trying to catch an attacker via logs		Resolved		
D019	Colot	High	Summary: Secure Login with Google Auth Test Case ID: TC_STUD_01 Steps to Reproduce: 1. Navigate to login page. 2. Click "Verify with recaptcha". 3. Click "Sign in with Google". 4. Select a valid student Google account. Test Data: Account: student@buksu.edu.ph Expected Result: User is authenticated and redirected to the Student Portal dashboard. Actual Result: Login failed. Remarks: After logging in using an institutional account and verifying the reCAPTCHA, an error message appears: "Login Failed: Please complete the reCAPTCHA verification." At the moment, a developer account is being used to bypass the error.	There was a misconfiguration to testers environment	None	Resolved		D020	Artanza	Medium	Summary: Student Grade Report Test Case ID: TC_STUD_09 Steps to Reproduce: 1. Navigate to "Grades". 2. Click the "Print" or "Download PDF" button. Test Data: Action: Download Expected Result: A PDF file is generated containing the student's grade report. Actual Result: No PDF generator available. Remarks: There is no PDF generator or button that allows students to print their grades.	The test case was applicable to the sytem	the test case has been removed	Resolved		
D021	Artanza	Medium	Summary: Profile Management Test Case ID: TC_STUD_14 Steps to Reproduce: 1. Go to "Profile". 2. Click "Edit". 3. Upload new photo or change detail. 4. Click "Save". Test Data: Filename: new_pic.jpg Expected Result: Profile page reflects the updated picture and details. Actual Result: Cannot upload profile pictures. Remarks: Students cannot upload or update profile pictures.	The test case was applicable to the sytem	the test case has been removed	Resolved		
D022	Artanza	Medium	Summary: Unsupported File Upload Rejection Test Case ID: TC_STUD_14-1 Steps to Reproduce: 1. Go to "Profile" and click "Edit". 2. Attempt to upload a profile picture. - File Type: pdf - File Size: 10MB (assuming a max limit of 2MB) 3. Click "Save". Test Data: File: oversized.pdf Expected Result: System displays an error message (e.g., "Unsupported file type" or "File size exceeds limit") and prevents the upload. Actual Result: No error displays as it does not have a button or function for uploading. Remarks: There is no button or function available for uploading files.	The test case was applicable to the sytem	the test case has been removed	Resolved		
D023	Bernabe	Medium	Summary: AI service is down or not responding Test Case ID: TC_STUD_15-1 Steps to Reproduce: 1. Click chatbot icon 2. Type question and send 3. AI service fails to respond Test Data: Query: "What is my grade in IT 133?" Expected Result: Chatbot responds with "AI unavailable. Please try again later. Actual Result: The chatbot remains available. Remarks: After following the steps, the chatbot continues to function and remains available.	During the testing, the TC_STUD_15-1, the AI version integrated to the server is already unavailable.	The developers just updated the AI to its new version	Resolved		
D024	Artanza	Low	Summary: Irrelevant/Out-of-Scope Query (Negative) Verify the chatbot correctly identifies queries outside its domain (e.g., non-academic or personal questions). Test Case ID: TC_STUD_15-2 Steps to Reproduce: 1. Click the Chatbot icon. 2. Type an irrelevant or out-of-scope question (e.g., "What is the capital of France?"). 3. Send message. Test Data: Query: "What is the capital of France?" Expected Result: Chatbot responds with a message indicating it cannot assist with that topic, or directs the user to a relevant resource if possible (e.g., "I can only help with academic/enrollment queries."). Actual Result: The AI responds to the irrelevant question. Remarks: After asking an irrelevant question, the chatbot responded outside the scope of grade-related queries.	the AI was not been configured to limit its answer that are not related to the system	The AI has been feeded and configured to answer only the related questions to the system	Resolved		
D025	Artanza	Low	Summary: Select Non-Existent Term (Negative) Test Case ID: TC_FAC_03-1 Steps to Reproduce: 1. Click Year/Semester dropdown. 2. Select term with no data. Test Data: Term: "1990-1991" Expected Result: System displays "No classes found for this term" or shows empty state. Actual Result: no dropdown term or click term: 1990-1991 Remarks: There is no dropdown term for 1990-1991	the academic year 1990-1991 was not been declared to the system. In addition, there incomplete instruction for the test data	we have changed the data into its correct input	Resolved		
D026	Artanza	Low	Summary: View/Select Sections and Subjects Test Case ID: TC_FAC_04 Steps to Reproduce: 1. Locate "My Classes". 2. Click on a specific Section/Subject card. Test Data: Class: "IT 133 - Section A" Expected Result: User is taken to the detailed class management page for that section. Actual Result: It does display the handled section. Remarks: It wasn't "Class Section" perhaps it was "My Sections"	Incorrect input for the test steps	we have changed the test steps into correct input	Resolved		
D027	Colot	Low	Summary: Select Empty Section (Edge Case) Test Case ID: TC_FAC_04-1 Steps to Reproduce: 1. Locate "My Classes". 2. Click on section with no students. Test Data: Class: "Empty Section" Expected Result: System displays "No students enrolled in this section" message. Actual Result: It does display no sections assigned to you yet. Remarks: It wasn't "Class Section" perhaps it was "My Sections"	Incorrect input for the test steps	we have changed the test steps into correct input	Resolved		
D028	Colot	Low	Summary: Add Students to Class Test Case ID: TC_FAC_05 Steps to Reproduce: 1. Open a Class Section. 2. Click "Add Student". 3. Search/Enter student name. 4. Click "Confirm". Test Data: Student: "Dalacruz, Juan" Expected Result: Student appears in the class roster. Actual Result: It does allow me to add a student but the new section name is not "Class Section" Remarks: It wasn't "Class Section" perhaps it was "Students"	Incorrect input for the test steps	we have changed the test steps into correct input	Resolved		
D029	Artanza	Low	Summary: Add Non-Existent Student (Negative) Test Case ID: TC_FAC_05-1 Steps to Reproduce: 1. Open Class Section. 2. Click "Add Student". 3. Enter invalid student name/ID. 4. Click "Confirm". Test Data: Student: "Invalid Name" Expected Result: System displays error "Student not found in database". Actual Result: It does display invalid name but the nav section name is not "Class Section" Remarks: It wasn't "Class Section" perhaps it was "Students"	Incorrect input for the test steps	we have changed the test steps into correct input	Resolved		

D030	Bernabe	Low	Summary: Create Activity for Grading Test Case ID: TC_FAC_06 Steps to Reproduce: 1. Open Class Section. 2. Click "Create Activity". 3. Input Title and Max Score. 4. Save. Test Data: Activity: "Quiz 1" Max Score: 50 Expected Result: New activity column appears in the gradebook. Actual Result: It does display the new activity column Remarks: It wasn't "Create activity" perhaps it was " Add Activity"	Incorrect input for the test steps	we have change the steps into its correct respective steps	Resolved	Create Activity for Grading TC_FAC_06 Verify faculty can create quizzes/exams with max scores. 1. Open My Section. 2. Click "Create Activity". 3. Input Title and Max Score. 4. Save.	Create Activity for Grading TC_FAC_06 Verify faculty can create quizzes/exams with max scores. 1. Navigate Class Management 2. Click Class Management 3. Click My Sections 4. Navigate "Add Activity" 5. Click the button 6. Fill the necessary inputs required 7. Click Create Button	
D031	Bernabe	Medium	Summary: Create Activity with Empty Title (Negative) Test Case ID: TC_FAC_06-1 Steps to Reproduce: 1. Open Class Section. 2. Click "Create Activity". 3. Leave title blank, enter max score. 4. Save. Test Data: Title: (empty) Max Score: 50 Expected Result: System displays error "Activity title is required". Actual Result: Create button is disabled Remarks: It failed because there is no pop-up message showing "Activity title is required"	Incorrect input for the test steps and also incorrect expected output on the test case	we have change the steps into its correct respective steps and change the expected output to its corresponding exact output	Resolved	TC_FAC_06-1 Create Activity with Empty Title (Negative) Verify system validates activity title 1. Open Class Section. 2. Click "Create Activity". 3. Leave title blank, enter max score. 4. Save. Title: (empty) Max Score: 50 System displays error "Activity title is required"	TC_FAC_06-1 Create Activity with Empty Title (Negative) Verify system validates activity title 1. Navigate Class Management 2. Click Class Management 3. Click My Sections 4. Navigate "Add Activity" 5. Click the button 6. Fill the necessary inputs required except the title Title: "Quiz 1" Max Score: 50 Category: "Class Standing" Max Score: 100 Start Date: 03/11/2026 Start Date & Time: "03/11/2026 01:30 PM" End Date & Time: "03/13/2026 01:30 PM" The create button is disabled	
D032	Bernabe	High	Summary: Create Duplicate Activity Name (Negative) Test Case ID: TC_FAC_06-3 Steps to Reproduce: 1. Open Class Section. 2. Click "Create Activity". 3. Enter existing activity name. 4. Save. Test Data: Activity: "Quiz 1" (duplicate) Expected Result: System displays error "Activity with this name already exists". Actual Result: Activity with the same title as the previous activity was still created Remarks: The expected result was not achieved.	the tile of the activity was not been set to a unique attribute	The attribute of the Activity title has been set to unique	Resolved			
D033	Colot	Low	Summary: Enter Score Exceeding Max (Negative) Test Case ID: TC_FAC_07-1 Steps to Reproduce: 1. Locate "Quiz 1" column (Max:50). 2. Click input box. 3. Enter score greater than max. Test Data: Score: 55 Expected Result: System displays error "Score cannot exceed maximum of 50". Actual Result: It wasn't allow me to put a lower score than defined score Remarks: If the score is already defined, it mustn't allow me to put the max score other than defined score Remarks: If the score is already defined, it mustn't enter a greater score, so the expected result is not achieved. Also, I can't input a greater score than the defined score	Incorrect expected output	Change the expected output to its exact output	Resolved	TC_FAC_07-1 Enter Score Exceeding Max (Negative) Verify system validates score against maximum 1. Locate "Quiz 1" column (Max:50). 2. Click input box. 3. Enter score greater than max. Score: 55 System displays error "Score cannot exceed maximum of 50"	TC_FAC_07-1 Enter Score Exceeding Max (Negative) Verify system validates score against maximum 1. Locate "Quiz 1" column (Max:50). 2. Click input box. 3. Enter score greater than max. Score: 55 The user cannot input score that exceed the defined max scores.	
D034	Colot	Low	Summary: Enter Negative Score (Negative) Test Case ID: TC_FAC_07-2 Steps to Reproduce: 1. Locate activity column. 2. Click input box. 3. Enter negative score. Test Data: Score: -5 Expected Result: System displays error "Score must be a positive number or zero". Actual Result: It wasn't allow me to put a lower score than defined score Remarks: If the score is already defined, it mustn't enter a score less than the current score, so the expected result is not achieved. Also, I can't input a greater score than the defined score.	Incorrect expected output	Change the expected output to its exact output	Resolved	TC_FAC_07-2 Enter Negative Score (Negative) Verify system rejects negative values 1. Locate activity column. 2. Click input box. 3. Enter negative score. Score: -5 System displays error "Score must be a positive number or zero"	TC_FAC_07-2 Enter Negative Score (Negative) Verify system rejects negative values 1. Locate activity column. 2. Click input box. 3. Enter negative score. Score: -5 The user cannot input score that not a discrete number/ non number such as negative values.	
D035	Artanza	Low	Summary: Enter Non-Numeric Score (Negative) Test Case ID: TC_FAC_07-3 Steps to Reproduce: 1. Locate activity column. 2. Click input box. 3. Enter text instead of number. Test Data: Score: "ABC" Expected Result: System displays error "Please enter a valid number" or prevents non-numeric input. Actual Result: I'll type the non-numeric characters no input is shown Remarks: It allows me to enter non-numeric character	Incorrect expected output	Change the expected output to its exact output	Resolved	TC_FAC_07-3 Enter Non-Numeric Score (Negative) Verify system validates data type 1. Locate activity column. 2. Click input box. 3. Enter text instead of number. Score: "ABC" System displays error "Please enter a valid number" or prevents non-numeric input.	TC_FAC_07-3 Enter Non-Numeric Score (Negative) Verify system validates data type 1. Locate activity column. 2. Click input box. 3. Enter text instead of number. Score: "ABC" The user cannot input non-numeric scores in this form.	
D036	Artanza	High	Summary: Update Score to Invalid Value (Negative) Test Case ID: TC_FAC_08-1 Steps to Reproduce: 1. Locate existing score. 2. Change to value exceeding max. 3. Save. Test Data: Old: 45 New: 105 (Max: 50) Expected Result: System displays error "Score cannot exceed maximum of 50". Actual Result: It wasn't allow me to put the max score other than defined score Remarks: If the score is already defined, it mustn't enter a greater score, so the expected result is not achieved. Also, I can't input a greater score than the defined score	Incorrect expected output	Change the expected output to its exact output	Resolved	TC_FAC_08-1 Update Score to Invalid Value (Negative) Verify system validates updated scores 1. Locate existing score. 2. Change to value exceeding max. 3. Save. Old: 45 New: 105 (Max: 50) System displays error "Score cannot exceed maximum of 50"	TC_FAC_08-1 Update Score to Invalid Value (Negative) Verify system validates updated scores 1. Locate existing score. 2. Change to value exceeding max. 3. Save. Old: 45 New: 105 (Max: 50) The user cannot input score that exceed to the defined max scores.	
D037	Artanza	High	Summary: View Final Grades with Incomplete Data (Edge Case) Test Case ID: TC_FAC_09-1 Steps to Reproduce: 1. Navigate to "Final Grades" view. 2. Check grades for students with incomplete scores. Test Data: Student: Missing scores Expected Result: System shows "Incomplete" status or calculates based on available data with notation. Actual Result: The result will just show a failed final grades no incomplete message Remarks: The result will just show a failed final grades no incomplete message, which is not his expected result	Incorrect expected output	Changed the expected output to its exact output	Resolved	TC_FAC_09-1 View Final Grades with Incomplete Data (Edge Case) Verify system handles missing scores in calculations 1. Navigate to "Final Grades" view. 2. Check grades for students with incomplete scores. Student: Missing scores System shows "Incomplete" status or calculates based on available data with notation.	TC_FAC_09-1 View Final Grades with Incomplete Data (Edge Case) Verify system handles missing scores in calculations 1. Navigate to "Final Grades" view. 2. Check grades for students with incomplete scores. Student: Missing scores System shows "Failed" status or calculates based on available data with notation.	
D038	Colot	High	Summary: Print and Export Sheets Test Case ID: TC_FAC_10 Steps to Reproduce: 1. Click "Export Grade Sheet". 2. Select format (PDF/Excel). Test Data: Format: PDF Expected Result: File is downloaded containing official class grades. Actual Result: Error Failed to create final grade spreadsheet: Failed creating spreadsheet with service account (drive fallback): The user's Drive storage quota has been exceeded. Remarks: The expected result was not achieved	Incorrect expected output	Changed the expected output to its exact output	Resolved	TC_FAC_10 Print and Export Sheets Verify faculty can export grade sheets. 1. Click "Export Grade Sheet" 2. Select format (PDF/Excel) Format: spreadsheet File is downloaded containing official class grades.	TC_FAC_10 Print and Export Sheets Verify faculty can export grade sheets. 1. Click "Export Grade Sheet" 2. Select format (PDF/Excel) Format: spreadsheet Generate spreadsheet containing official class grades	
D039	Bernabe	Low	Summary: Export Empty Gradebook (Negative) Test Case ID: TC_FAC_10-1 Steps to Reproduce: 1. Open class with no grades. 2. Click "Export Grade Sheet". Test Data: Class: "Test" Expected Result: System displays error "No grades available to export" or disables export button. Actual Result: Error Failed to create final grade spreadsheet: Failed creating spreadsheet with service account (drive fallback): The user's Drive storage quota has been exceeded. Remarks: The expected result was not achieved	The test case is not applicable to our system	The test case has been removed	Resolved	TC_FAC_10-1 Export Empty Gradebook (Negative) Verify system handles empty class data 1. Open class with no grades. 2. Click "Export Grade Sheet" Class: "Test" System displays error "No grades available to export" or disables export button.	TC_FAC_10-1 Export During Network Failure (Negative) Verify system handles disconnect errors 1. Click "Export Grade Sheet". 2. Simulate network interruption during download. System displays error "Export failed, please try again" with retry option.	
D040	Colot	Low	Summary: Export During Network Failure (Negative) Test Case ID: TC_FAC_10-2 Steps to Reproduce: 1. Click "Export Grade Sheet". 2. Simulate network interruption during download. Test Data: Format: PDF Expected Result: System displays error "Export failed, please try again" with retry option. Actual Result: Error Failed to create final grade spreadsheet: Failed creating spreadsheet with service account (drive fallback): The user's Drive storage quota has been exceeded. Remarks: The expected result was not achieved	The test case is not applicable to our system	The test case has been removed	Resolved	TC_FAC_10-2 Export During Network Failure (Negative) Verify system handles disconnect errors 1. Click "Export Grade Sheet" 2. Simulate network interruption during download Format: PDF System displays error "Export failed, please try again" with retry option.	TC_FAC_10 Print and Export Sheets Verify faculty can export grade sheets. 1. Click "Export Grade Sheet" 2. Select format (PDF/Excel) Format: spreadsheet Generate spreadsheet containing official class grades TC_FAC_11 View Semestral Overview Verify faculty can see all assigned load for the semester. 1. Go to "Overview" tab. 2. Review list. N/A Complete list of subjects and sections for the term is displayed.	
D041	Colot	Low	Summary: View Semestral Overview Test Case ID: TC_FAC_11 Steps to Reproduce: 1. Go to "Overview" tab. 2. Review list. Test Data: None Expected Result: Complete list of subjects and sections for the term is displayed. Actual Result: The expected result was not achieved Remarks: The tab is not overview it is in the " My Sections"	Incomplete Test Steps that leads to confusion	Refinement and revision of the Test Steps	Resolved	TC_FAC_11 View Semestral Overview verify faculty can see all assigned load for the semester. 1. Go to "Overview" tab. 2. Review list. N/A Complete list of subjects and sections for the term is displayed.	TC_FAC_11 View Semestral Overview Verify faculty can see all assigned load for the semester. 1. Go to "Overview" tab. 2. Review list. N/A Complete list of subjects and sections for the term is displayed.	
D042	Colot	Medium	Summary: Set Past Date for Activity (Negative) Test Case ID: TC_FAC_12-1 Steps to Reproduce: 1. Open an Activity. 2. Set date in the past. 3. Save. Test Data: Date: "Jan 1, 2020" Expected Result: System displays warning "Deadline is in the past. Are you sure?" or error. Actual Result: End date/time must be after start date/time Remarks: The expected output is not the same as the exact output	Incorrect expected output	Changed the expected output to its exact output	Resolved	TC_FAC_12-1 Set Past Date for Activity (Negative) Verify system validates deadline dates. 1. Open an Activity. 2. Set date in the past. 3. Save. Date: "Jan 1, 2020" System displays warning "Deadline is in the past. Are you sure?" or error.	TC_FAC_12-1 Set Past Date for Activity (Negative) Verify system validates deadline dates. 1. Open an Activity. 2. Set date in the past. 3. Save. Date: "Jan 1, 2020" System displays warning "End date/time must be after start date/time"	
D043	Colot	High	Summary: Set Activity Without Date (Edge Case) Test Case ID: TC_FAC_12-2 Steps to Reproduce: 1. Open an Activity. 2. Leave date field empty. 3. Save. Test Data: Date: (empty) Expected Result: System saves activity without deadline or displays "No deadline set". Actual Result: Fill out this field Remarks: The activity without deadline will not be saved because it requires deadline	Incorrect expected output	Changed the expected output to its exact output	Resolved	TC_FAC_12-2 Set Activity Without Date (Edge Case) Verify system handles activities without deadlines 1. Open an Activity. 2. Leave date field empty. 3. Save. Date: (empty) System displays warning "End date/time must be after start date/time"	TC_FAC_12-2 Set Activity Without Date (Edge Case) Verify system handles activities without deadlines 1. Open an Activity. 2. Leave date field empty. 3. Save. Date: (empty) System displays warning "Please fill out this field"	
D044	Colot	Medium	Summary: Edit Activity Schedule Test Case ID: TC_FAC_14 Steps to Reproduce: 1. Click an event on Calendar. 2. Edit date. 3. Save. Test Data: New Date: "Oct 22" Expected Result: Calendar updates to new date. Actual Result: Can't edit in calendar at the Activity Schedule Remarks: Event is not clickable for edit	Unidentified promblem cause	Upon verifying the bug, the developers can edit activity date through the calendar module	Resolved		Start Date & Time * 03/11/2026 01:32 PM End Date & Time * 03/13/2026 01:32 PM	
D045	Artanza	High	Summary: Edit Activity to Invalid Date (Negative) Test Case ID: TC_FAC_14-1 Steps to Reproduce: 1. Click event on Calendar. 2. Change to invalid date format. 3. Save. Test Data: New Date: "Invalid" Expected Result: System displays error "Please enter a valid date". Actual Result: Can't edit in calendar at the Activity Schedule Remarks: Event is not clickable for edit	Unidentified promblem cause	Upon verifying the bug, the developers can edit activity date through the calendar module	Resolved		Start Date & Time * 03/11/2026 01:32 PM End Date & Time * 03/13/2026 01:32 PM	
D046	Colot	Low	Summary: Update Profile with Invalid Data (Negative) Test Case ID: TC_FAC_18-1 Steps to Reproduce: 1. Go to "Profile". 2. Enter invalid phone number format. 3. Save. Test Data: Info: "abc123" Expected Result: System displays error "Please enter a valid phone number". Actual Result: Can't input invalid phone number. Remarks: It allows me to enter the invalid number	The test case is not applicable to our system	The test case has been removed	Resolved	TC_FAC_18-1 Update Profile with Invalid Data (Negative) Verify system validates phone formatting 1. Go to "Profile". 2. Enter invalid phone number. 3. Save. Info: "abc123" System displays error "Please enter a valid phone number".	TC_FAC_18-1 Update Profile with Empty Required Fields (Negative) Verify system validates required fields 1. Go to "Profile". 2. Clear required field. 3. Save. Field: Display name System displays error "This field is required" or prevents save.	
D047	Artanza	High	Summary: Logout with Unsaved Grades (Edge Case) Test Case ID: TC_FAC_20-2 Steps to Reproduce: 1. Enter grades without saving. 2. Click "Logout". Test Data: Action: Logout Expected Result: System shows confirmation "You have unsaved changes. Are you sure you want to logout?" Actual Result: Logged out after confirming to log out without warning message for the unsaved changes Remarks: Won't show a warning message that they have unsaved changes and will be logged out after confirming that they'll log out, not the "You have unsaved changes."	Incorrect expected output	Changed the expected output to its exact output	Resolved	TC_FAC_20-2 Logout with Unsaved Grades (Edge Case) Verify system warns about unsaved changes 1. Enter grades without saving. 2. Click "Logout". Action: Logout System shows confirmation "Unsaved changes. Are you sure?"	TC_FAC_20-2 Logout with Unsaved Grades (Edge Case) Verify system warns about unsaved changes 1. Enter grades without saving. 2. Click "Logout". Action: Logout "The system will not saved the changes in the grades and it will continue to logout despite not doing action to save changes."	

D048	Colot	High	Summary: Access Admin Page with Expired Session (Negative) Test Case ID: TC_ADMIN_02-2 Steps to Reproduce: 1. Log in as Admin. 2. Wait for the session timeout period (e.g., 30 minutes). 3. Attempt to refresh the page or click a dashboard link. Test Data: N/A Expected Result: User is logged out and redirected to the Login page with a message: "Session expired, please log in again." Actual Result: It didn't logged out automatically due to session expiration. Remarks: Left the system open for a couple of hours and came back still logged in.	Incorrect expected output	Changed the expected output to its exact output	Resolved	
D049	Artanza	Low	Summary: Forgotten Password with Valid Email (Negative) Test Case ID: TC_ADMIN_03-1 Steps to Reproduce: 1. Click "Forgot Password". 2. Enter an email that is not registered as an admin account. 3. Submit. Test Data: Email: nonadmin@institution.edu Expected Result: System displays a message to prevent fishing, such as: "If the email address is registered, a password reset link has been sent." (A specific error should be avoided for security). Actual Result: Proceeded to the verify code. Remarks: The error message wasn't displayed, although the email for reset code wasn't sent to the student's email address.	Backend code not declared functions for only registered admin email	Adding backend function	Resolved	
D050	Colot	Blocker	Summary: Forgotten Password - Link Expiration (Boundary) Test Case ID: TC_ADMIN_03-2 Steps to Reproduce: 1. Request a password reset. 2. Wait for 60 minutes (or the defined expiration time of the link). 3. Click the reset link in the email. Test Data: Email: admin@institution.edu Expected Result: Reset link is expired; system displays an error page. "This password reset link is no longer valid. Please request a new one." Actual Result: Can't proceed to reset password. Remarks: Error message "adminAuth.verifyResetCode is not a function"		Recurring problem. Already stated at the bug ID D006	Resolved	
D051	Colot	Low	Summary: Forgotten Password - Repeated Requests (Boundary) Test Case ID: TC_ADMIN_03-3 Steps to Reproduce: 1. Request a password reset. 2. Immediately request another reset for the same email address. 3. Check the inbox. Test Data: Email: admin@institution.edu Expected Result: Only the most recent reset link is valid, invalidating the previous one. (Alternatively, the system should rate-limit requests and send a single, most recent link). Actual Result: Can't proceed to reset password. Remarks: Error message "adminAuth.verifyResetCode is not a function"		Recurring problem. Already stated at the bug ID D006	Resolved	
D052	Artanza	Low	Summary: Reset Page Input Validation (Negative) Test Case ID: TC_ADMIN_03-5 Steps to Reproduce: 1. Request and click a valid password reset link. 2. On the reset page, attempt to set the new password to an invalid value (e.g., shorter than 8 characters, or blank). 3. Click "Submit". Test Data: New Password: "" pass123 Expected Result: System displays an error: "Password must be at least 8 characters long and contain a mix of uppercase letters, lowercase letters, and numbers." (or other defined complexity rules). Actual Result: Can't proceed after Verify Code. Remarks: It says "adminAuth.verifyResetCode is not a function"		Recurring problem. Already stated at the bug ID D006	Resolved	
D053	Bernabe	Low	Summary: Semester Management - Dates (Boundary) Test Case ID: TC_ADMIN_05-1 Steps to Reproduce: 1. Navigate to "Semester Management". 2. Set the 'End Date' to be a date before the 'Start Date'. 3. Click "Save". Test Data: Start Date: 2027-01-01 End Date: 2026-09-01 Expected Result: System displays validation error: "End Date must be after the Start Date." The term is not created. Actual Result: Semester successfully created. Remarks: Entered "2025-2024", and it was created successfully, which should not happen. The system should display an error message.	The test case is not applicable to our system	The test case has been removed	Resolved	
D054	Colot	High	Summary: Entering Invalid Year Format (Boundary/Imperfect) Test Case ID: TC_ADMIN_06-3 Steps to Reproduce: 1. Navigate to "Semester Management". 2. Enter the School Year as a single year (e.g., "2027") instead of the required "YYYY-YYYY" format. 3. Click "Save". Test Data: Year: 2027 Sem: 2nd Expected Result: System displays a validation error requiring the "YYYY-YYYY" format, or the system auto-corrects to "2027-2028" and displays a confirmation message. Actual Result: Successfully added a new school year and semester that only contains a single year. Remarks: It didn't showed an error message or a validation error that the format should be a "YYYY-YYYY"	No validation	Adding School year Validation	Resolved	 D055	Colot	High	Summary: Creation of Term with Special Characters (Negative) Test Case ID: TC_ADMIN_06-4 Steps to Reproduce: 1. Navigate to "Semester Management". 2. Enter special characters in the Year field (e.g., "`` AY@#$ ``). 3. Click "Save". Test Data: Year: "`` AY@#$ ``" Sem: Summer Expected Result: System displays a validation error: "School Year must contain only alphanumeric characters." (or a hyphen (e.g., "2025-2026")." The term is not created. Actual Result: Successfully added a new school year and semester that contains special characters. Remarks: Didn't showed an error message or a validation error that special characters is not allowed.	No validation	Adding School year Validation	Resolved	
D056	Bernabe	High	Summary: Overlapping Schedules for Instructor (Imperfect) Test Case ID: TC_ADMIN_06-4 Steps to Reproduce: 1. Create a new section (Section B) and assign an instructor (Dr. Smith) a time slot (MW 8:00-9:30 AM) that already has another section (Section A) assigned to Dr. Smith. 2. Click "Save". Test Data: Section: Section B Instructor: Dr. Smith Schedule: MW 8:00-9:30 AM Expected Result: System displays a warning: "Dr. Smith has a schedule conflict for MW 8:00-9:30 AM. Do you wish to proceed?" The section should be created only if the admin explicitly confirms, or the creation is blocked until the conflict is resolved. Actual Result: Date and time can't be input. Remarks: There's no input field for time slot.	The test case is not applicable to our system	The test case has been removed	Resolved	
D057	Artanza	High	Summary: Section Name Special Character Validation (Boundary) Test Case ID: TC_ADMIN_06-5 Steps to Reproduce: 1. Navigate to "Section Management". 2. Enter Section Name with invalid characters (e.g., "`` IT*133* ``"). 3. Click "Save". Test Data: Section: "`` IT*133* ``" Subject: Any Instructor: Any Expected Result: System displays a validation error: "Section Name can only contain alphanumeric characters, hyphens, and spaces." The section is not created. Actual Result: Successfully created a section with special characters. Remarks: It shouldn't be successful because of the inserted special characters before and after the letters and numbers.	No validation	Adding Validation	Resolved	D058	Bernabe	High	Summary: Attempt to Create Duplicate Subject Code (Negative) Test Case ID: TC_ADMIN_07-1 Steps to Reproduce: 1. Navigate to "Subject Management". 2. Attempt to create a new subject using a Code that already exists (e.g., TC_ADMIN_01a code). 3. Click "Save". Test Data: Code: IT 133 Description: Data Structures Expected Result: System displays a specific error message: "Subject code IT 133 already exists. Please use a unique code." The new subject is not created. Actual Result: Successfully created a subject. Remarks: Used an existing code and still proceeds to create a subject, even though it shouldn't.	The section code does not posses any unique attributes	Make the section key as a unique key	Resolved	
D059	Bernabe	High	Summary: Add Subject with Blank Description (Negative) Test Case ID: TC_ADMIN_07-2 Steps to Reproduce: 1. Navigate to "Subject Management". 2. Enter a unique Code (e.g., PE 102) and leave the Description field blank. 3. Click "Save". Test Data: Code: PE 102 Description: (Blank) Expected Result: System displays a validation error message: "Subject Description is required." The subject is not created. Actual Result: It doesn't proceed on creating a subject, it shows a validation message because a required field is empty. "Please fill out this field." Subject Code. Remarks: It wasn't "Description", but the actual one is "Subject Name"	we have changed the test steps and data into correct input	Resolved	
D060	Bernabe	High	Summary: Special Characters in Subject Code (Boundary) Test Case ID: TC_ADMIN_07-4 Steps to Reproduce: 1. Navigate to "Subject Management". 2. Enter a Code with invalid special characters (e.g., "`` IT@101* ``"). 3. Click "Save". Test Data: Code: "`` IT@101* ``" Description: Test Subject Expected Result: System displays a validation error: "Subject Code can only contain alphanumeric characters, spaces, or hyphens." The subject is not created. Actual Result: Successfully created a subject. Remarks: Subject shouldn't be created because of the special characters in Subject Code.	Incorrect input for the test steps and test data	Resolved	D061	Bernabe	High	Summary: Invite Already Registered User (Negative) Test Case ID: TC_ADMIN_08-1 Steps to Reproduce: 1. Navigate to "User Management". 2. Enter the email of an existing, active faculty member. 3. Click "Send Invite". Test Data: Email: existingprof@bukeo.edu.ph Expected Result: System displays an error: "This email is already registered as a Faculty. Cannot send invitation." The existing account status is unchanged. Actual Result: Instructor invitation sent successfully Remarks: The invitation was sent, and the instructor was successfully created even though they already exist.			Resolved	
D062	Bernabe	High	Summary: Attempt to Archive Active User (Negative) Test Case ID: TC_ADMIN_10-1 Steps to Reproduce: 1. Navigate to "User Management". 2. Search for a known active Faculty member (e.g., currently teaching classes). 3. Click the "Archive" button. 4. Confirm the archival action. Test Data: User: "Active Faculty" Role: Faculty Expected Result: System displays a warning message: "Cannot archive active user. This user is currently assigned to 3 sections. Please unassign before proceeding." The archival is blocked. Actual Result: Instructor archived successfully Remarks: It only displays a successful message instead of an error.			Resolved	
D063	Artanza	High	Summary: Archive of User with Active Session (Imperfect) Test Case ID: TC_ADMIN_10-2 Steps to Reproduce: 1. Log in as a sub-Admin user (e.g., Student) on a separate browser. 2. As Admin, navigate to "User Management" and archive the logged-in Student account. 3. Return to the Student's browser and attempt to navigate to a new page (e.g., "My Grades"). Test Data: Admin: admin@bukeo.edu.ph Student: student@bukeo.edu.ph Expected Result: The Student's active session is immediately terminated or invalidated. The Student is redirected to the login page upon their next action. The archival logs note the termination of the active session. Actual Result: Student archived successfully Remarks: Student's session still active in other sections.	fix - must not continue to navigate through sections after archive	Unimplemented		D064	Artanza	High	Summary: Attempt to Archive Active Subject (Negative) Test Case ID: TC_ADMIN_11-1 Steps to Reproduce: 1. Navigate to "Subject Management". 2. Search for a subject that is currently assigned to at least one active section. 3. Click the "Archive" button. 4. Confirm the archival action. Test Data: Subject: IT 133 (3 Active Sections) Expected Result: System displays a warning message: "Cannot archive subject. This subject is currently assigned to 3 active sections. Please archive the sections first or unassign the subject." The archival is blocked. Actual Result: Subject Archived Successfully Remarks: After I confirm the archive, it says 'Subject successfully archived' instead of 'Cannot archive subject' even though it is currently assigned to three sections.	The test case is not applicable to our system	The test case has been removed	Resolved	
D065	Bernabe	High	Summary: Attempt to Archive Active Section (Negative) Test Case ID: TC_ADMIN_12-1 Steps to Reproduce: 1. Navigate to "Section Management". 2. Search for a section that belongs to the current, active semester (e.g., "CS 101-A"). 3. Click the "Archive" button. 4. Confirm the archival action. Test Data: Section: "CS 101-A" Semester: Current Active Expected Result: System displays a warning message: "Cannot archive active section. This section is part of the current active semester." OR "This section has currently enrolled students." The archival is blocked. Actual Result: The current active section is Successfully Archived Remarks: The subject was archived instead of being blocked. The system should display a warning message: 'Cannot archive active section. This section is part of the current active semester' or 'This section has currently enrolled students,' and prevent the archival.	The test case is not applicable to our system	The test case has been removed	Resolved	
D066	Bernabe	High	Summary: Attempt to Archive Semester with Active Sections (Negative) Test Case ID: TC_ADMIN_13-2 Steps to Reproduce: 1. Navigate to "Semester Management". 2. Select a completed semester that still has one or more active (unarchived) sections associated with it. 3. Click "Archive". 4. Confirm the archival action. Test Data: Semester: AY 2024-2025, 2nd Sem (3 active sections) Expected Result: System displays a warning message: "Cannot archive semester. 3 active sections are assigned to this term. Please archive or unassign sections first." The archival is blocked, and the sections remain active and unarchived. Actual Result: successfully archived the semester Remarks: The system allowed the semester to be archived successfully, even though it still had active (unarchived) sections. The expected behavior to block archival until all sections are archived was not enforced.				
D067	Colot	High					

[illegible]	Bernabe	Critical	Summary: Unarchival and Making Password Imperfect(Boundary) Test Case ID: TC_ADMIN_14-1 Steps to Reproduce: 1. Go to "Archival Management". 2. Select an archived user. 3. Click "Unarchive". 4. The user's original password hash is somehow invalid or missing from the database record. Test Data: Action: Unarchive User Expected Result: The unarchival completes, but the system forces the user to immediately go through a "Forgotten Password" flow upon their first login attempt to ensure they can gain access. Actual Result: The unarchival process completed successfully, and the user was able to log in normally without being forced to reset their password. Remarks: Although the unarchival completed, the system forced the user to go through the "Forgotten Password" flow on first login. The expected behavior was for the user to log in normally without being forced to reset their password.			Unresolved
[illegible]	Cruce	Medium	Summary: Unarchival with Archived Instructor (Negative/Boundary) Test Case ID: TC_ADMIN_16-1 Steps to Reproduce: 1. Unsave the instructor (e.g., Prof. Johnson) for a section (e.g., HIS 201-A) to currently marked as "Unassigned/Needs Review". 2. Attempt to unarchive the section HIS 201-A. 3. Confirm the action. Test Data: Section: HIS 201-A Instructor: Archived Prof. Johnson Expected Result: System displays a warning: "Cannot unarchive section: The assigned instructor is inactive/archived. Please assign an active instructor first." The unarchival is blocked, or it proceeds but the section is immediately marked as "Unassigned/Needs Review". Actual Result: The system blocked the unarchival or marked the section as "Unassigned/Needs Review" because the instructor was inactive, without automatically handling or alerting the Admin. Remarks: The system blocked the unarchival or allowed it to proceed with the section marked as "Unassigned/Needs Review" because the assigned instructor is inactive or archived. The expected behavior is: automatically handle or alert for inactive instructors—was not fully enforced, but the			Unresolved	
D070	Artanza	High	Summary: Unarchival Audit Log Verification (Positive) Test Case ID: TC_ADMIN_16-4 Steps to Reproduce: 1. Perform a successful unarchival of a section. 2. Navigate to the "Audit Logs". 3. Search for the action. Test Data: Action: Unarchive Section Section: IT-133-A Expected Result: The audit log shows a record with "Action: Section Unarchived," "User: [Admin Name]," "Target: IT-133-A," "Timestamp: [Time of Action]." The log details should reflect the status change from archived to active, and possibly the re-linking of the instructor. Actual Result: The logs don't display that it has been unarchived Remarks: no logs input for unarchive	Maybe the testers did some actions before going to the system log	None	Resolved	
D071	Bernabe	High	Summary: Unarchival of Section with Active Dependencies (Negative/Boundary) Test Case ID: TC_ADMIN_17-1 Steps to Reproduce: 1. Go to "Archival Management". 2. Select an archived semester (AY 2023-2024). 3. Attempt to unarchive the semester while its associated sections/subjects are still archived. 4. Click "Unarchive". Test Data: Semester: AY 2023-2024 (Archived) Expected Result: System displays a warning: "Some associated sections/subjects are still archived. Do you want to unarchive them automatically, or block this action?" (Result depends on system design priority). If blocked, an error message states: "Cannot unarchive semester until all dependencies are restored." Actual Result: The system proceeds with unarchiving, without warning message Remarks: the system doesnt block/shows confirmation message	The test case is not applicable to our system	The test case has been removed	Resolved	
D072	Colot	High	Summary: Unarchival of The Last Semester (Boundary/Imperfect) Test Case ID: TC_ADMIN_17-5 Steps to Reproduce: 1. Archive all but one semester. 2. Archive the last remaining semester. 3. Unarchive the last semester. 4. Check the system's "Current/Active Term" setting Test Data: Expected Result: Since there are no other active terms, the system should either ask the Admin to manually set the Active Term, or it should automatically set the unarchived semester as the new "Current Active Term" and notify the Admin (depending on the system's business logic for handling an empty active term list). Actual Result: The system did not automatically set the active term and there's no notification that been sent. Remarks: no current active term settings	The test case is not applicable to our system	The test case has been removed	Resolved	
D073	Colot	Medium	Summary: Access Archival Page via Direct URL (Positive) Test Case ID: TC_ADMIN_18-3 Steps to Reproduce: 1. Clear browser cookies (or log in). 2. Navigate directly to the Archival Management URL. Test Data: URL: /admin/archive Expected Result: If logged in, the Archival Management Page loads successfully. If not logged in, the user is redirected to the login page (TC_ADMIN_02-1) and then redirected to the Archival Management Page upon successful login. Actual Result: unsuccessful redirection Remarks: the redirection goes to login page even the user is already log in	The test case is not applicable to our system	The test case has been removed	Resolved	
D074	Bernabe	Medium	Summary: Search/Filter in Archival Management (Positive/Boundary) Test Case ID: TC_ADMIN_18-5 Steps to Reproduce: 1. Access the Archival Management Page and select a tab (e.g., Archived Users). 2. Use the search bar to look up a specific item (e.g., "Jane Doe"). 3. Apply a filter (e.g., Filter: Role = Student). 4. Switch to the "Archived Subjects" tab and use the search bar to look up a specific subject. Test Data: Search Query: [Archived User Name] Filter: Role = Student Expected Result: The search functionality works correctly on the archived data within the currently selected tab. The list updates instantly, showing the matched results. Switching tabs resets the search and filter states. Actual Result: Can't search specific users Remarks: no search bar	The test case is not applicable to our system	The test case has been removed	Resolved	
D075	Colot	Medium	Summary: Filter by Action Type (Positive) Test Case ID: TC_ADMIN_19-2 Steps to Reproduce: 1. Access Audit Logs. 2. Apply a filter to show only "Grade Change" actions. 3. Observe the list. Test Data: Filter: Action = Grade Change Expected Result: The list is filtered to display only actions related to grade modifications, including the specific grade that was changed (Old Value, New Value) and the reason for the change (if applicable). Actual Result: grade change Filter action can't be executed Remarks: There is no filter selection for grade change	The test case is not applicable to our system	The test case has been removed	Resolved	
D076	Artanza	Medium	Summary: Search Audit Logs by User Activity (Positive) Test Case ID: TC_ADMIN_19-3 Steps to Reproduce: 1. Access Audit Logs. 2. Use the search bar to look up activity related to a specific user ID or name. 3. Observe the list. Test Data: Search Query: [User ID of specific Student] Expected Result: The search results display all actions performed by and/or targeting the specified user, regardless of the timestamp. Actual Result: Action can't be excuted Remarks: no search bar	The test case is not applicable to our system	The test case has been removed	Resolved	
D077	Artanza	Low	Summary: Log Immediately Reflecting Entries (Security/Imperfect) Test Case ID: TC_ADMIN_19-4 Steps to Reproduce: 1. Log in as Admin and perform a critical action (e.g., delete a user, unarchive a subject). 2. Immediately check the Audit Logs for the record. 3. Check for the user who performed the action. Test Data: Action: Delete User User: Admin Expected Result: The log entry for the critical action appears immediately. The entry accurately records the action, the specific Admin user who performed the action (and not a generic "System" user), and the log cannot be edited or deleted by the Admin. Actual Result: can only archive the user and successfully unarchive a subject Remarks: no delete button	The test case is not applicable to our system	The test case has been removed	Resolved	
D078	Bernabe	High	Summary: Log Timezone Verification (Boundary) Test Case ID: TC_ADMIN_19-5 Steps to Reproduce: 1. Check the system's defined timezone setting. 2. Perform an action (e.g., a test login) and note the exact time. 3. Check the Audit Logs for the logs entry. Test Data: System Timezone: PST Test Action Time: 10:00 AM Expected Result: The timestamp in the Audit Log matches the system's defined timezone (PST) and accurately reflects the time of the action (10:00 AM). The log entries should all use a consistent timezone. Actual Result: log in timestamp can't be seen Remarks: there's no activity log for login	The test case is not applicable to our system	The test case has been removed	Resolved	
D079	Bernabe	Medium	Summary: Download Report in Different Format (Positive) Test Case ID: TC_ADMIN_20-1 Steps to Reproduce: 1. Navigate to "Reports". 2. Select a report type (e.g., "Faculty Load"). 3. Select a different format (e.g., CSV/Excel). 4. Click "Download". 5. Open the downloaded file. Test Data: Report: Faculty Load Format: CSV/Excel Expected Result: A file in the selected format (CSV/Excel) is successfully downloaded. The data is correctly formatted within the document structure (e.g., cells are separated by commas in CSV, organized in columns in Excel). Actual Result: The Report will automatically download as pdf Remarks: no different format selection	The test case is not applicable to our system	The test case has been removed	Resolved	
D080	Colot	High	Summary: Download Report with No Data (Negative/Boundary) Test Case ID: TC_ADMIN_20-2 Steps to Reproduce: 1. Navigate to "Reports". 2. Select a report type (e.g., "New Student Registrations"). 3. Select a date range where no new students were registered. 4. Click "Download". Test Data: Report: New Student Registrations Date Range: No Data Expected Result: The system either: a) Downloads a report that contains headers but no data rows, or b) Displays a message on-screen, such as "No data available for the selected criteria." The system does not crash or generate a corrupted file. Actual Result: Action can't be done Remarks: no selection new student registration	The test case is not applicable to our system	The test case has been removed	Resolved	
D081	Bernabe	High	Summary: Report Generation Time for Large Data (Imperfect) Test Case ID: TC_ADMIN_20-3 Steps to Reproduce: 1. Navigate to "Reports". 2. Select a comprehensive report (e.g., "All Historical Grades"). 3. Click "Download". 4. Measure the time until the download starts. Test Data: Report: All Historical Grades Volume: Very Large Expected Result: The download begins within a reasonable time (e.g., < 30 seconds for very large files). A progress indicator (e.g., "Generating Report...") is displayed during the generation process to prevent user confusion and multiple clicks on the request. Actual Result: Action can't be done Remarks: no selection for all historical grade	The test case is not applicable to our system	The test case has been removed	Resolved	
D082	Colot	Medium	Summary: Download Report with Invalid Parameters (Negative) Test Case ID: TC_ADMIN_20-4 Steps to Reproduce: 1. Navigate to "Reports". 2. Select a report type. 3. The system is imperfectly allowed to submit a request without selecting a format (e.g., the format dropdown is left blank). 4. Click "Download". Test Data: Report: Enrolled Students Format: [Blank] Expected Result: System displays a validation error: "Please select a file format for the report." The download does not start. Actual Result: The Report will automatically be downloaded Remarks: no input field for reports	The test case is not applicable to our system	The test case has been removed	Resolved	
D083	Colot	Medium	Summary: Report Content Verification (Positive) Test Case ID: TC_ADMIN_20-5 Steps to Reproduce: 1. Download the "Enrolled Students" report. 2. Compare the total count of students in the report file to the total count displayed on the "User Management" page. 3. Check for the presence of mandatory columns (e.g., Student ID, Name, Section). Test Data: Report: Enrolled Students Expected Result: The total count of active students in the report matches the system's live count. All mandatory columns are present, and the data in the report is accurate and not truncated. Actual Result: Action can't be done Remarks: there's no enrolled students selection to be downloaded	The test case is not applicable to our system	The test case has been removed	Resolved	
D084	Colot	High	Summary: Report Security (PII Verification) (Security/Boundary) Test Case ID: TC_ADMIN_20-6 Steps to Reproduce: 1. Download reports containing student or faculty data. 2. Verify that the report does not contain highly sensitive PII that is outside the scope of the report (e.g., student's family income or an instructor's tax ID number, unless explicitly requested). 3. Check for watermarks/confidentiality footers. Test Data: Report: Student Details (PII) Expected Result: The report contains only relevant educational/system data. A footer or header stating "CONFIDENTIAL - For Internal Use Only" is present, ensuring data security integrity. Actual Result: The report can't be downloaded Remarks: no selection/option for student details report	The test case is not applicable to our system	The test case has been removed	Resolved	
D085	Artanza	Medium	Summary: Profile Management Test Case ID: TC_ADMIN_21 Steps to Reproduce: 1. Go to Profile. 2. Edit details. 3. Save. Test Data: Name: "Admin One" Expected Result: Profile is updated. Actual Result: The Profile can't be updated Remarks: no edit profile function			Resolved	
D086	Artanza	Medium	Summary: Update Profile with Invalid Data (Negative) Test Case ID: TC_ADMIN_21-1 Steps to Reproduce: 1. Navigate to "Profile Settings". 2. Attempt to update a required field (e.g., Name) with an invalid input (e.g., numbers only, or leaving it blank). 3. Click "Save". Test Data: Name: " " 12345 " Expected Result: System displays a validation error (e.g., "Name must contain only letters and spaces"). The profile is not saved. Actual Result: action can't be done Remarks: no edit profile function	fix last and first name must not accept number in names	Resolved	
D087	Artanza	Medium	Summary: Update Profile with Primary Email Change (Boundary) Test Case ID: TC_ADMIN_21-2 Steps to Reproduce: 1. Navigate to "Profile Settings". 2. Attempt to change the primary email address. 3. Click "Save". Test Data: New Email: admin.two@institution.edu Expected Result: System displays a warning: "Changing the primary email requires re-verification." The system sends a verification link to the new email. The change only takes effect after the Admin clicks the verification link, and the old email remains active until then. Actual Result: email can't be change Remarks: no edit/ change function	Did not implement a profile edit function	Added a functionality where the user can edit email information in their profile	Resolved	
DOB8	Remabe	Medium	Summary: Profile Update Audit Log Verification (Positive) Test Case ID: TC_ADMIN_21-4 Steps to Reproduce: 1. Successfully update a profile field (e.g., change the last name). 2. Navigate to "Audit Logs". 3. Search for the action. Test Data: Action: Profile Update Field: Last Name Expected Result: The Audit Log contains a record: "Action: Profile Update," "User: [Admin Name]," "Field: Last Name," "Old Value: [Old Name]," "New Value: [New Name]," "Timestamp: [Time of Action]." The log should capture both the old and new values for critical fields. Actual Result: Profile can't be updated Remarks: no-edit/update function	Did not implement a profile edit function	Added a functionality where the user can add information in their profile for big verification	Resolved																
DOB9	Remabe	Low	Summary: UI Reflection Delay (Imperfect) Test Case ID: TC_ADMIN_21-5 Steps to Reproduce: 1. Successfully update the admin's name. 2. Immediately observe the name displayed in the top-right corner of the dashboard/navigation bar. 3. Navigate to a second page. Test Data: Field: Name New Value: Admin V2 Expected Result: The admin's name in the top navigation bar updates immediately after the save action without requiring a full page refresh or navigation to another page. Actual Result: Profile can't be updated Remarks: there's no way to edit or update information	Did not implement a profile edit function	Added edit profile button in profile page for editing or updating information	Resolved																
DOB0	Artiaraza	Low	Summary: Logout Audit Log Verification (Positive) Test Case ID: TC_ADMIN_23-2 Steps to Reproduce: 1. Successfully log in and then log out as Admin. 2. Navigate to the "Audit Logs" (as Admin, using a new session). 3. Search for the action. Test Data: Action: Logout Expected Result: The Audit Log contains a record: "Action: Logout," "User: [Admin Name]," "Target: Self," "Timestamp: [Time of Action]." The log should be a complete record of the session, including the login (TC_ADMIN_01) and logout actions. Actual Result: The logs doesn't display the logout and login sessions Remarks: incomplete data logs	Maybe the testers did some actions before going to the system log	None	Resolved
